

Election Auditing Bibliography

Joseph Lorenzo Hall*

February 12, 2010 (v3.8)[†]

Abstract

This bibliography lists all work in the field of election auditing of which the author is aware. It takes an expansive view of the term *election audit* to encompass pre-election audit activities as well as post-election audit activities such as manual tallies, ballot reconciliation and forensic machine audits. Entries are roughly sorted by publication date. No attempt has been made to include articles from the popular press; this list represents scholarly, advocate, election official and vendor publications relevant to election auditing.
